

Operational tools for improving efficiency in wildfire risk reduction in EU landscapes (FIREfficient)

EU, Directorate-General for Humanitarian Aid and Civil Protection - European Community Humanitarian Office (ECHO)
2013 CALL FOR PROJECTS ON PREVENTION AND PREPAREDNESS IN CIVIL PROTECTION AND MARINE POLLUTION

“Dealing with innovative tools and practices for the integration of wildfire risk assessment into land-use planning and management”

The project seeks to build capacity for land and wildfire risk planners transferring best practices and lessons learned in wildfires management in the planning practices and processes and moving towards a common frame across Europe through:

- Capitalization of knowledge, tools and procedures to **improve landscape resilience** to wildfires in the context of different socio-economic environments within the EU from a cost-effective approach.
- Consolidating the methodology, data sources and **enhancing the comparability of the results on wildfire events prediction assessment**.
- To strengthen the performance of existing successful tools and procedures applied at best practice sites, and to **enhance their transfer capacity to land and wildfire risk planners** at EU level.

FIREfficient Action Plan: a sequential process of capitalization and transfer of knowledge and experiences
